National Finalist in 4 editions (OMM and ONMAPS).

Education

TecNM Campus Acapulco

Computer Systems Engineering
Specialized in Data Science

Aug 2020 – Jul 2025
Acapulco

Experience

Fullstack Developer

Mundo Imperial

Jan 2025 – Jun 2025
Acapulco

- Designed and developed an end-to-end gym access control module using Laravel (database, business logic, and QR code validation) for a hotel chain.
- Designed and developed an inventory management module for a boutique, implementing the FIFO inventory method, inter-branch stock transfers, and validations to prevent data inconsistencies.

Web Developer and IT Support

Secretaría de Turismo de Acapulco

Jul 2024 – Dec 2024
Acapulco

- Maintained and enhanced a Next.js website in a 3-person team, including bug fixes and code refactoring.
- Developed administrative modules to digitize internal requests and reports, including generation of branded PDF documents used by about 50 employees.

Projects

Institutional Platform and Landing Page

Secundaria N. 8 "Benemérito de las Américas"

Jul 2025 – Jun 2026
Acapulco

- Full stack design and development of a platform using Angular and Spring Boot, includes authentication and permission-based roles, plus a landing page for institutional outreach.
- Implementation of a CMS system enabling administrative staff to manage the landing page's content without technical intervention.
